Adobe Creative Cloud Applications Installation

by: Muhammad Al-fiqh bin Mohd Salem

On November 6, 2023, Mersing Industrial Training Institute Resource Center organised an Adobe Creative Cloud Applications Installation, allowing the staff to use the applications such as Photoshop, Illustrator, and Premiere Pro. The event featured an insightful presentation on the diverse capabilities of Adobe Creative Cloud applications, emphasising their significance in contemporary design and multimedia projects. The involved officers also gave hands-on sessions to explore the features, learn practical tips for efficient workflow, and engage in a collaborative atmosphere that fostered knowledge exchange. Additionally, the effort showcased the adaptability of Adobe Creative Cloud applications across various industries, illustrating their relevance beyond educational settings. It is hoped that this installation, it will gain insights into real-world applications of these tools, broadening their understanding of the professional landscape. Interactive discussions on best practices and creative strategies enriched the overall learning experience. Overall, this prepares them to leverage these creative tools effectively in their future academic and professional pursuits.

KSDK Sports Carnival 2023

by: Jaazli bin Haji Ahmad

Kelab Sukan dan Kebajikan (KSDK) of Mersing Industrial Training Institute organised the inaugural KSDK Sports Carnival 2023. The event aimed to foster a sporting spirit and healthy lifestyle while strengthening camaraderie among ILP Mersing staff. The carnival comprised various sporting events that took place from August until the culmination in the final carnival held from October 30th to November 1st, 2023. Congratulations to the Black House for emerging as the overall champion of the Karnival Rumah Sukan KSDK ILP Mersing for the year 2023. Gratitude was extended to all involved parties for their contributions. The success of such sports events can encourage ILP Mersing staff to engage in regular sporting activities for personal health benefits and improved productivity.

A Talk On Welding World Skills

by: Jaazli bin Haji Ahmad

On November 8, 2023, the Mersing Industrial Training Institute organised a significant talk programme to share the preparation of participants for the World Skills Malaysia Youth 2023 competition in the field of welding. This programme involved participants who represented ILP Mersing in the competition, along with the Head of the Department, the Head of the Welding Technology Division, and the Director of ILP Mersing. The programme aimed to provide in-depth insights into the competition in welding, offer audiences practical advice from experts and motivate the audiences to strive for excellence in the field of welding. This programme is expected to provide ongoing support to the talented young generation in vocational skills in Malaysia. Overall, this talk programme served as a valuable platform for the next World Skills Malaysia Youth participants to better understand the expectations of the competition, gain practical insights, and be inspired to give their best efforts in the field of welding.

ILP Mersing Mawlid Al-Nabi 1445H Celebration

by: Muhammad Asyrah bin Mehammad

The Mawlid Al-Nabi 1445H celebration organised by the Mersing Industrial Training Institute in collaboration with the Al-Itqan Mosque Committee took place on November 15, 2023, at the Dewan Besar, Mersing Industrial Training Institute. The event was marked by the active involvement of the institute's community and the dedicated cooperation of the mosque committee members. Various religious activities, including lectures, nasheed performances, and collaborative initiatives, created an atmosphere of reverence and unity. The successful collaboration between the Mersing Industrial Training Institute and the Al-Itqan Mosque Committee in organising this celebration underscored the shared commitment to honouring the Prophet's life and teachings. The programme commenced with a heartfelt recitation of solawat and engaging lectures that deepened the participants' understanding of the Prophet's life.

Youth Volunteer Squad Programme (SATRIA)

by: Lukman Hakim bin Mhd Shafie

On November 17th and 18th, 2023, ILP Mersing, in collaboration with the Mersing District Youth Office, organised the Young Volunteer Squad Programme (SATRIA) to foster cooperation, courage, and environmental awareness among the participants. Through a series of activities, including a beach cleanup at Pantai Air Papan and Bukit Selantai, and a camping session, participants had the opportunity to reinforce leadership values, build independence, and enhance teamwork. The communal effort during the cleanup instilled an understanding of the importance of environmental cleanliness and cultivated team spirit and social responsibility towards preserving the environment. Meanwhile, the camping session served as a platform for participants to develop social skills, expand their social network, and cultivate an understanding of communal values. This programme aims to shape a responsible younger generation, instil care for the environment, and nurture a high spirit of cooperation in safeguarding the environment and serving the community.

Malaysia Techlympics UAV Engineering Challenge 2023

by: Mohamad Maziz Zikri Mohd Tahir

The Mersing Industrial Training Institute drone team's victory in the UAV Engineering Challenge at Malaysia Techlympics 2023 at PICC on November 19th and 20th was a remarkable feat, outshining nearly 40 rival teams from diverse educational institutions to claim the national championship. Their success was the result of adeptly handling drone assembly, configuration, and basic flight operations. Despite this achievement, the team encountered hurdles, including the challenging task of optimising drone performance within strict time constraints and managing complex logistical requirements. Yet, their dedication to ongoing research and development to advance their drone's technical capabilities underscored their commitment to staying abreast of relevant and efficient technologies. This triumph not only highlights their technical prowess but also emphasises the importance of perseverance and teamwork, serving as an inspiration to young engineers navigating contemporary technological challenges.

Basic Arduino Programming and Control Course

by: Muhammad Hazim Mohd Norhizam

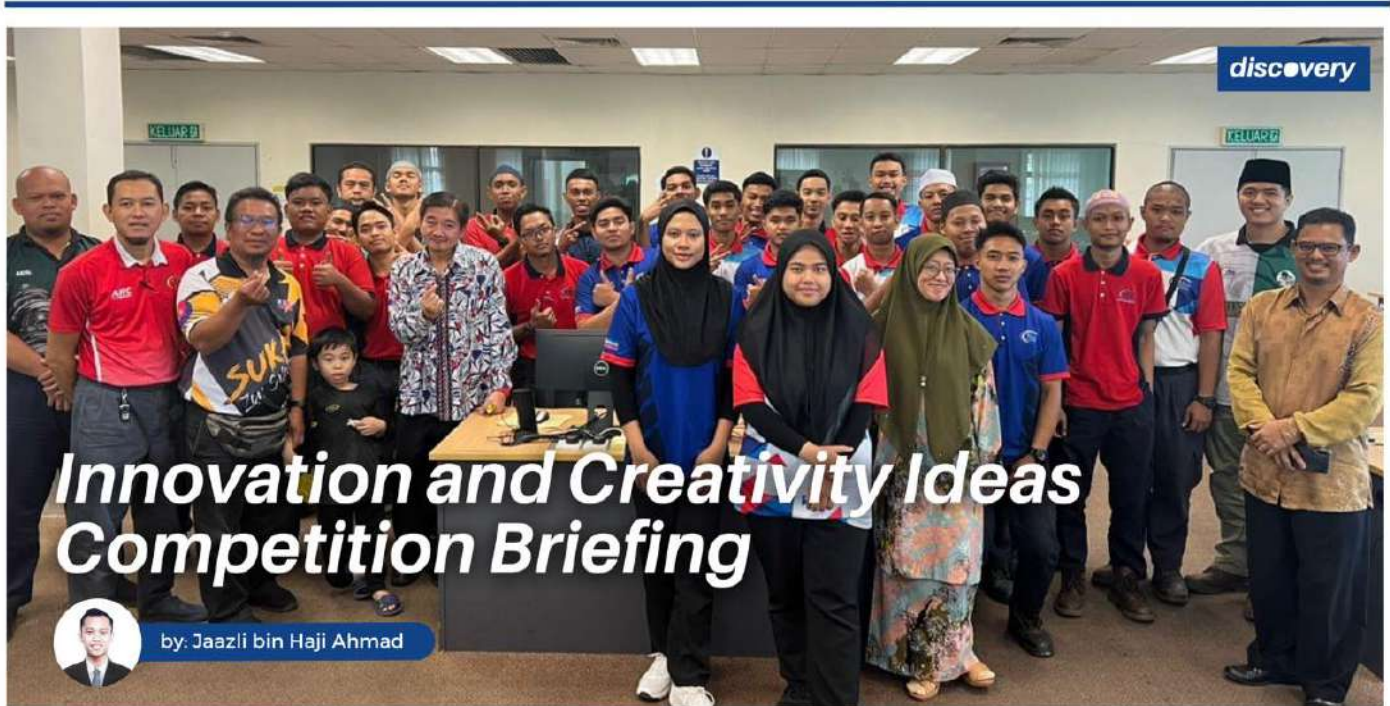

On 23 November 2023, Mersing Industrial Training Institute organised the Basic Arduino Programming and Control Course, which drew participation from 55 students across four high schools in the vicinity. The participants hailed from SMK Nitar, Mersing, SMK Tun Habab, SMK Air Tawar in Kota Tinggi, and SMK Felda Tenggara. This course not only engaged students but also involved 10 teachers instructing the Design and Technology (RBT) subject. The spirit of "Be inspired, be extraordinary, be world class with TVET" motivated attendees to delve into Arduino programming, broaden their technological knowledge, and foster an interest in engineering. The course successfully fostered a collaborative environment among students and teachers from different schools, providing opportunities for the exchange of ideas and experiences. Our hope is that this spirit will continue to drive excellence in the fields of technology and engineering for all participants.

On November 23, 2023, at 10 in the morning at the Shah Alam Convention Centre (SACC), a historic event was held to honor the outstanding achievements of the Mersing Industrial Training Institute in the field of drone technology at the World Skills Malaysia competition. ILP Mersing won gold and silver medals, with Mr. Mohd Fahmin bin Mohamad and Mr. Wan Hasyidan bin Wan Hussien dominating this field. The event, attended by key figures in the vocational education and training industry, also recognized individuals of excellence in the field of vocational education and training through the Tokoh Mahir Awards. The success of ILP Mersing and this event underscored the importance of vocational education in preparing high-quality human resources in Malaysia and inspired the younger generation to achieve higher heights in the future. The Gold Hand Award and Tokoh Mahir Award Ceremony 2023 is a proud moment and offers hope for the development of vocational education and skills in the country.

On the cheerful morning of November 23, 2023, the Shah Alam Convention Centre (SACC) witnessed a momentous event, the Gold Hand Awards and Tokoh Mahir Awards 2023 ceremony. The proudest moment belonged to a student from the Mersing Industrial Training Institute, Mohamad Afiq bin Mohd Azmi, who secured the bronze medal in the welding technology category. His remarkable feat served as a shining example of dedication and skill mastery, showcasing his prowess in national-level welding. Mohamad Afiq's achievement, as well as ILP Mersing's success, underscored the continuous growth of vocational education in Malaysia, emphasising the importance of staying relevant with contemporary technological skills. This ceremony was a momentous and inspiring occasion, reaffirming the significance of vocational education and skill development in the country. It is hoped that the spirit of excellence demonstrated will continue to inspire the younger generation to achieve greater heights in the future.

On November 23, 2023, at the Makmal Berlian, the Resource Center of the Mersing Industrial Training Institute, a briefing on participation in the ILP Mersing Innovation and Creativity Idea Competition 2023 was held, organised by the Bahagian Kawalan Kualiti Latihan (BKKL). The briefing was delivered by Ts. Norhafniza binti Mohamed, with additional insights from the Deputy Director of Operations, Ts. Syahrulnizam bin Razali. The purpose of this briefing was to provide guidance to participants on the entry process, evaluation criteria, and the competition's objectives. Participants were also given the opportunity to ask questions and seek further clarification. This briefing was a crucial step in preparing participants for the competition, ensuring that all participants had a clear understanding of their roles. Our hope is that this competition will provide students with the opportunity to showcase their creativity and innovation while enhancing their skills in generating excellent ideas.

This year, the Pahang Foundation organised the Merdeka and Malaysia Video Competition with the aim of capturing the spirit of independence and the cultural diversity of Malaysia. The competition concluded with a proud achievement when Ahmad Shafiq bin Ab Salim, a student from the Mersing Industrial Training Institute, emerged as the winner. He is also a member of the Discovery Creative Council, known for his creativity and talent. In the video produced by Ahmad Shafiq, he successfully depicted the spirit of Malaysian independence with creativity and a deep concern for the unity among various ethnicities and cultures in the country. This success is a remarkable accomplishment for Ahmad Shafiq and ILP Mersing. It solidifies ILP Mersing's position as a training center that produces creative and highly potential students in the field of arts and creativity. Congratulations to Ahmad Shafiq bin Ab Salim for this outstanding achievement, and we hope he continues to achieve success in the field of arts and creativity in the future.
